**TO WHOM IT MAY CONCERN:**

Re: **[... redacted]**

I am writing this letter on behalf of Mr. [... redacted]. He was under my care recently in St. Patrick's University Hospital for assessment. As part of this assessment he had a detailed out-patient assessment with Dr. Marie Lisa Spies and Dr. Rita Honan and this letter should be read in conjunction with this assessment, which is in [... redacted]'s possession.

In brief, Mr. [...] would appear to suffer from autistic spectrum disorder. It is my belief that with the appropriate support (which is detailed in his letter) [... redacted] should be able to resume his studies and work. I found no evidence of a major psychiatric disorder such as schizophrenia or bipolar disorder.

I hope this letter is of some assistance.

Prof. Paul Fearon  
Consultant Psychiatrist
