TO WHOM IT MAY CONCERN:

**Re: Colin Paul Gloster, 21 Bourne Avenue, Ashbourne, Co. Meath
DOB: 03.07.1980**

I am writing this letter on behalf of Mr. Colin Paul Gloster. He was under my care recently in St. Patrick's University Hospital for assessment. As part of this assessment he had a detailed out-patient assessment with Dr. Marie Lisa Spies and Dr. Rita Honan and this letter should be read in conjunction with this assessment, which is in Colin Paul's possession.

In brief, Mr. Gloster would appear to suffer from autistic spectrum disorder. It is my belief that with the appropriate support (which is detailed in his letter) Colin Paul should be able to resume his studies and work. I found no evidence of a major psychiatric disorder such as schizophrenia or bipolar disorder.

I hope this letter is of some assistance.

Prof. Paul Fearon
Consultant Psychiatrist
